SUMMARY

Final-year Data Science student at Queen's University Belfast, having just completed a year-long placement as an AI Engineer Intern at Rapid7, where I was offered a graduate role to return to after graduation. Looking for part-time work during my final year — reliable, organised, and experienced working in fast-paced, team-based environments from both a global tech placement and prior retail work.

EXPERIENCE

AI Engineer Intern

Jun 2025 – Jun 2026

Rapid7, Belfast

- Designed and built a shared software tool that standardised how my team tracks and compares machine learning results — adopted across multiple projects and still in use.
- Ran data analysis and experiments on real security data to help automatically filter out harmless alerts, cutting manual review workload for the security team.
- Presented my work directly to senior leadership twice, including leading a live demo and Q&A session for the AI leadership team.
- Rewrote outdated training material so future interns wouldn't hit the same setup problems I did.
- Worked daily as part of a team split between Belfast and the US, keeping communication clear across time zones.
- Secured a graduate job offer to return to Rapid7 after graduating.

Retail Worker

Aug 2021 – Jun 2025

China Treasure House, Portadown

- Managed customer orders and handled cash payments accurately in a fast-paced environment.
- Worked closely with colleagues to keep operations running smoothly during busy periods.
- Resolved customer queries efficiently and adapted quickly to changing demands under pressure.

ACADEMIC PROJECTS

TECHNICAL SKILLS

Programming: Python, Java, C++, SQL

Data & ML Libraries: Pandas, NumPy, TensorFlow, Scikit-learn, XGBoost, Matplotlib/Seaborn

ML/AI Tools: MLflow, CrewAI (agentic workflows)

Platforms: AWS SageMaker, Git/GitHub, JIRA, Confluence, Metabase

Dev Environments: Jupyter Notebooks, VS Code, Anaconda, Google Colab

AWARDS & CERTIFICATIONS

- The William Hamilton Data Science Prize (2024)
- Multi AI Agent Systems with crewAI (DeepLearning.AI, 2025)
- Practical Multi AI Agents & Advanced Use Cases (DeepLearning.AI, 2025)
- Complete A.I. & Machine Learning, Data Science Bootcamp (Udemy, 2024)
- Duke of Edinburgh Gold (TBC)
- OCN Youth Work Level 1 (2022)
- British Sign Language Level 1 (2023)

SOFT SKILLS

Teamwork & Collaboration, Communication, Problem Solving, Adaptability, Leadership, Willingness to Learn

INTERESTS

LeetCode, GitHub, QUB Badminton Society, Machine Learning, Computer Hardware, Travelling

ADDITIONAL INFORMATION

-
- **Databases** — Built a MySQL database for managing student work-placement records, progressed through normalisation to 3rd Normal Form.
 - **Object-Oriented Programming** — Built a Java application for storing and retrieving image data, applying inheritance, polymorphism, and encapsulation.

Full UK Driving Licence
English (Fluent)
Mandarin (Conversational)
Japanese (Beginner)

VOLUNTEERING

- **Oasis Youth Centre** — Designed and built the centre's website (Wix), including a volunteer sign-up form, to improve accessibility and their online presence.

EDUCATION

BSc Data Science with a Year of Professional Experience

Sep 2023 – Present

Queen's University Belfast

Level 2 Modules (TBC): Data Structures & Algorithms in C++, Intro to AI & Machine Learning, Linear Algebra, Professional & Transferable Skills, Statistical Inference, Theory of Computation

Level 1 Modules (Completed): Procedural Programming in Java (87%), Databases in MySQL (66%), OOP in Java (75%), Intro to Statistics & Probability (66%), Intro to Linear Algebra & Analysis (69%)

A-Levels

2023

Mathematics (A*), Further Mathematics (A), Computer Science (A), Chemistry (B)

GCSE

2021

10 GCSEs, including Mathematics (A*), Digital Technology Programming (A), and Further Mathematics (A*)
